EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

Paragraph 0001 has been replaced by the following substitute paragraph:

---This application is a divisional of U.S. Patent Application No. 10/084,837, filed February 26, 2002, now U.S. Patent No. 6,638,424, and entitled "Stormwater Treatment Apparatus" which is a continuation-in-part of U.S. Patent Application No. 09/487,097, filed January 19, 2000, now U.S. Patent No. 6,350,374, and entitled "Stormwater Treatment Apparatus." Both prior applications are incorporated herein by reference in their entirety.---

2. The following is an examiner's statement of reasons for allowance: Independent claims 44 and 54 have been amended to recite that the inactive pool is formed by at least a first pair of inactive pool baffles, each of the baffles extending upward from a bottom of the receptacle, but not above the permanent pool level which is defined by the outlet opening, the inactive pool being gravitationally below the active pool, which is not disclosed or suggested in the prior art of record. With respect to claim 51, it has been amended to incorporate the limitations of claim 44, and the final recited trapping step is not disclosed or suggested in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached PTO-892 form disclose water treatment systems.
